Transport help for Covid-19 and flu vaccinations

NHS

To help people that are unable to travel to a vaccination clinic a free patient transport service is now available.

The service has been set up to provide eligible residents in Leicestershire and Rutland the opportunity to get vaccinated this autumn by helping them to get to and from a vaccination clinic if they live remotely or have no other means of transportation.

To check your eligibility please call: **01530 512456.** Telephone lines are open Monday to Friday until midday

The service is operational to provide patient transport Monday – Friday all day.

Please note the service provider will check your eligibility and will book you into a suitable Covid-19 and flu clinic. The service will arrange for people to be taken to and from their appointment, all at no cost.
